

```
const express = require('express');

const app = express();

app.get('/beat', (req, res) => res.status(200).send( body: 'auth service is up'));

app.listen(
  port: process.env.PORT || port,
  callback: () => console.info( message: `App is listening on ` + (process.env.PORT || port) + `.` )
);
```
